

MusIQ

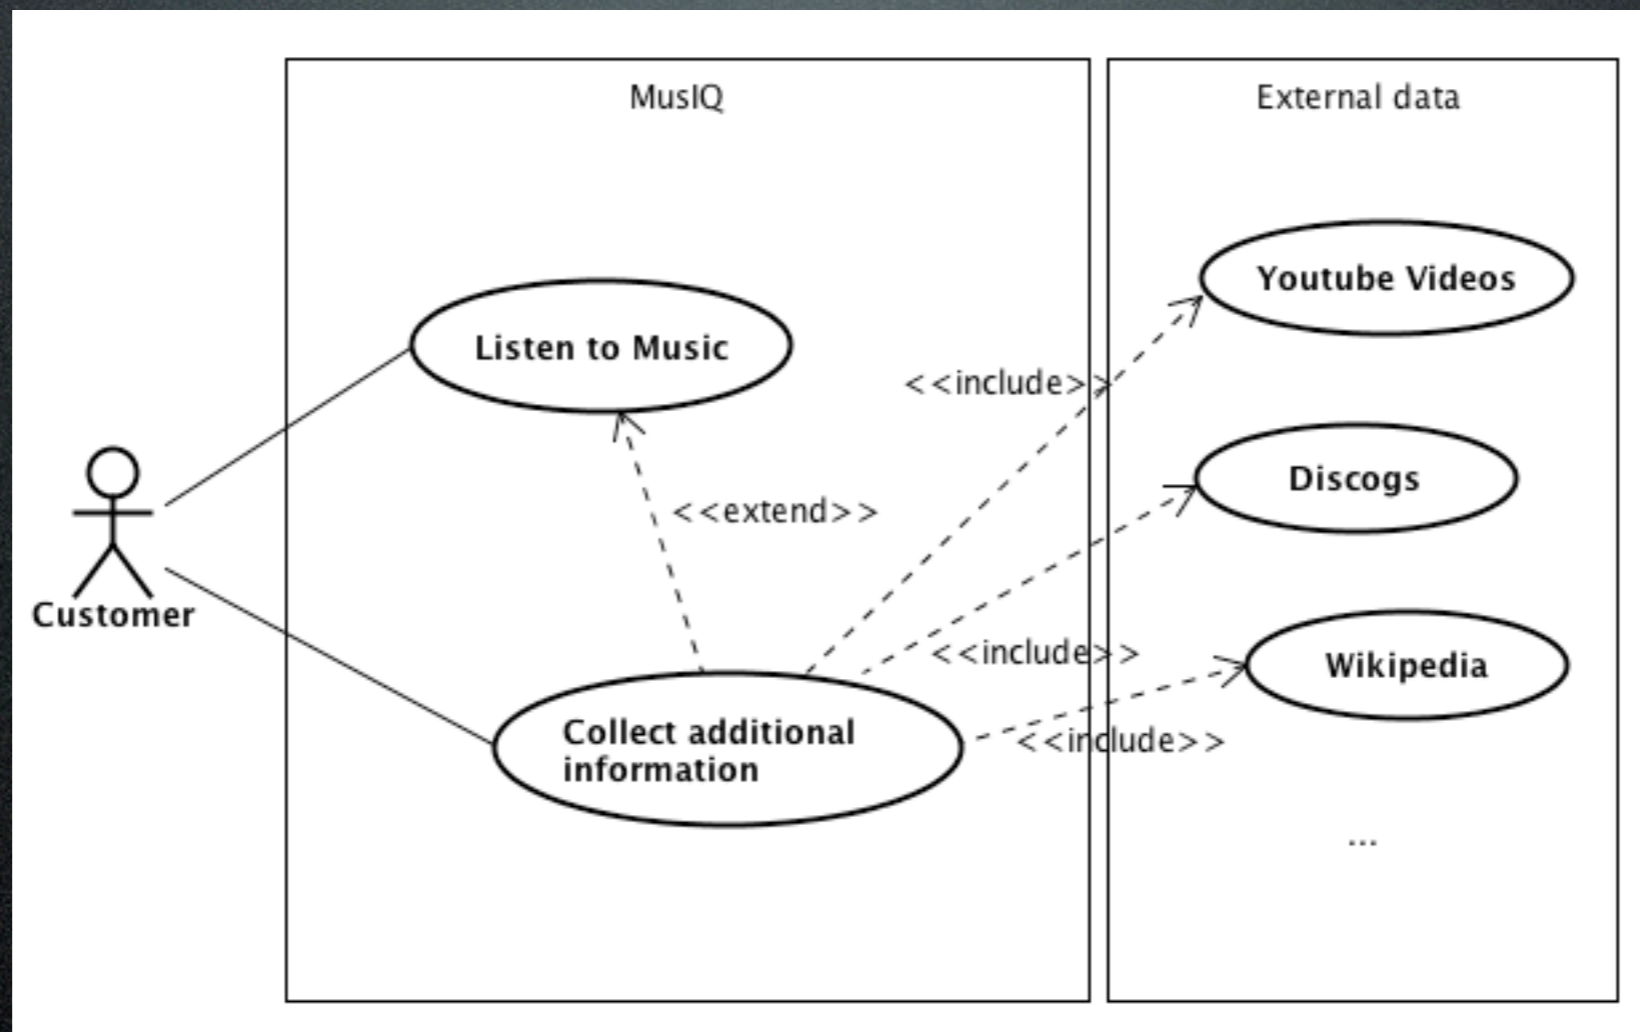

Group 6:

Sina Grunau & Sebastian Hagedorn

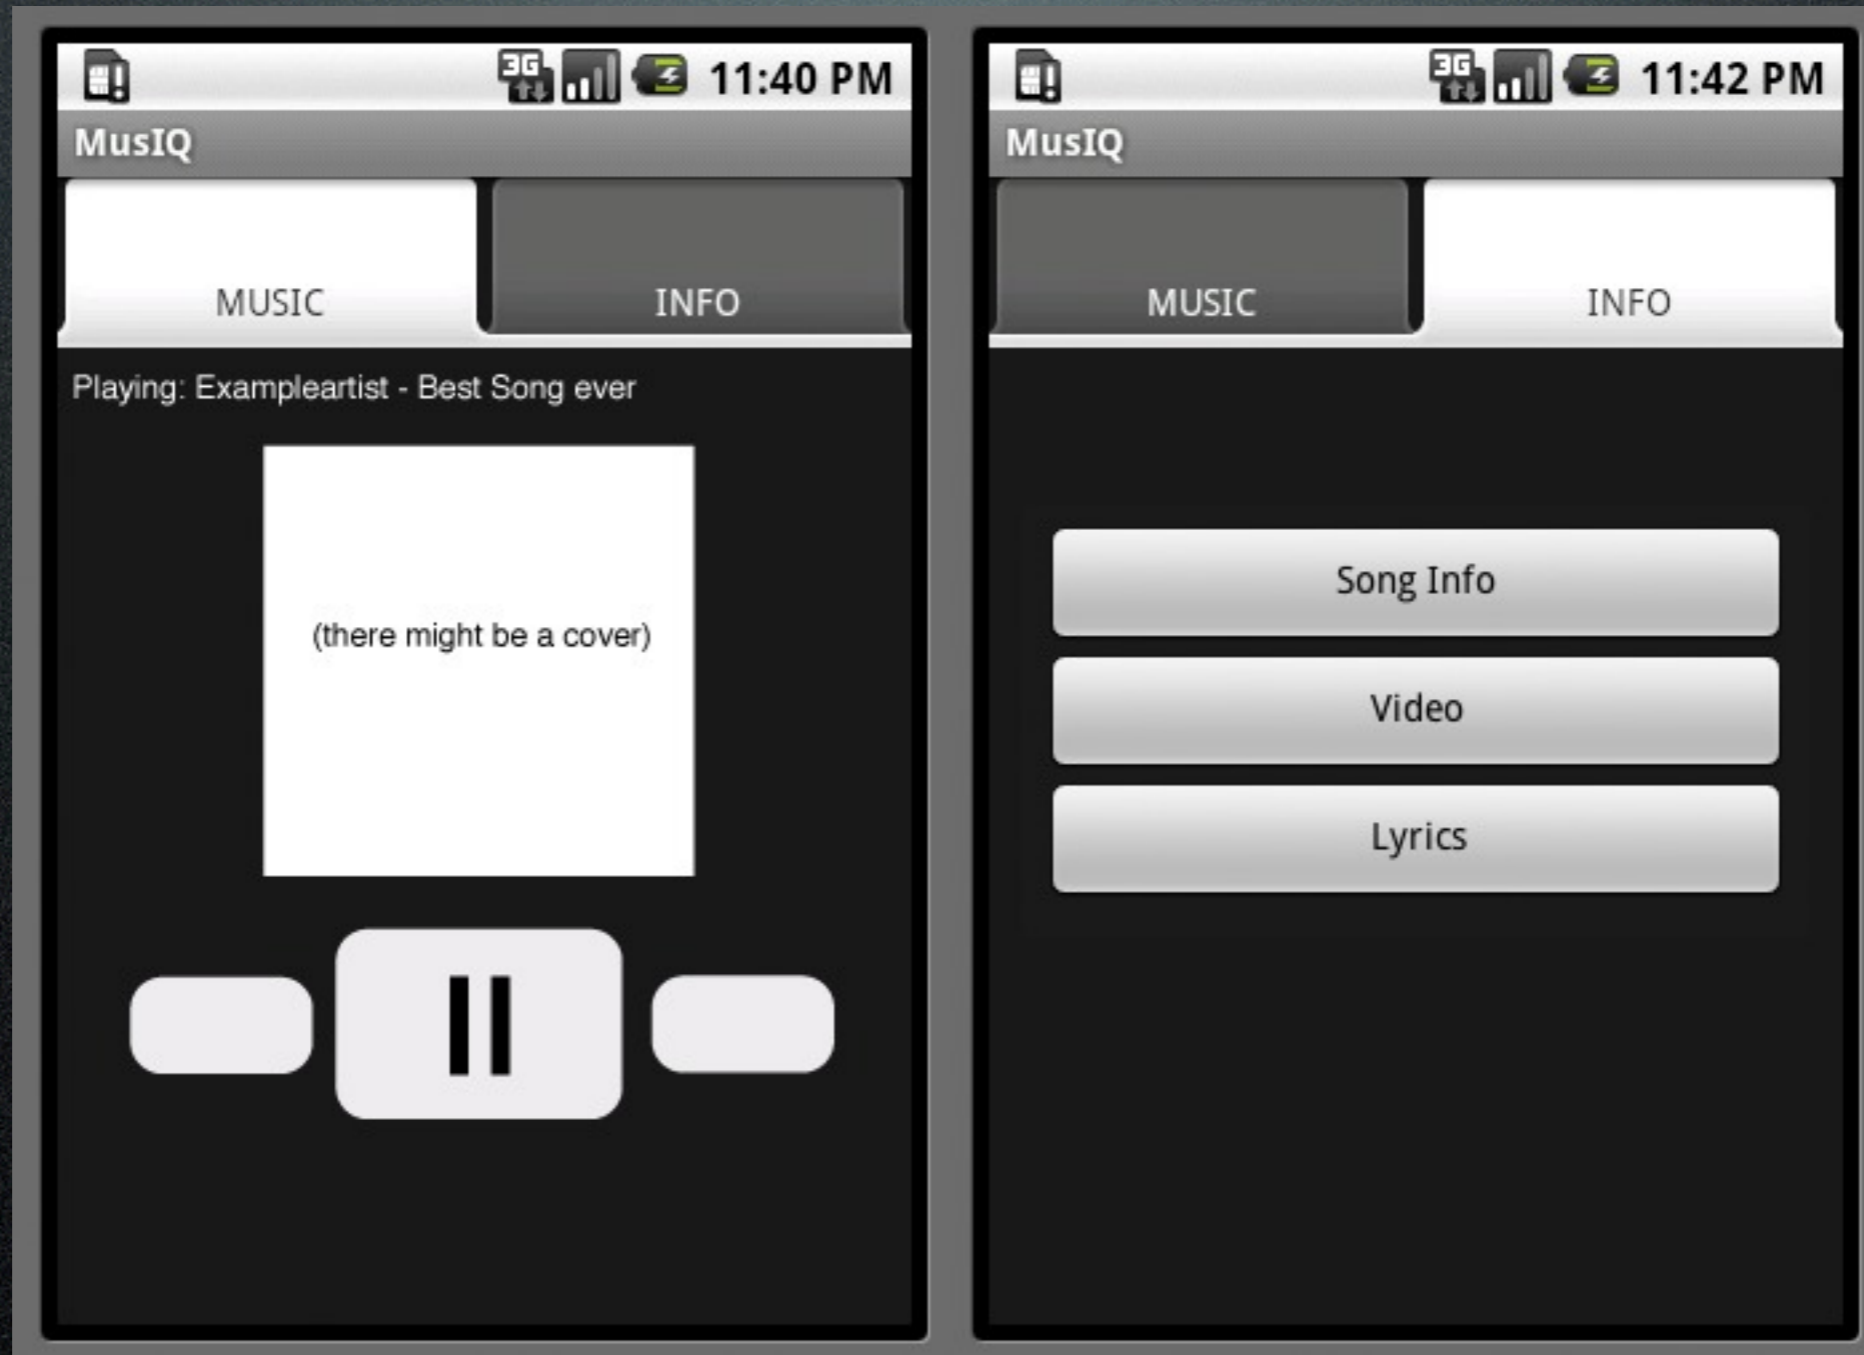

Application Scenario

- music player
- additional information:
 - album, video, biography, (lyrics),...
 - direct links to content: no browsing!
- designed for daily use

Use Case

Mockup

Technologies

- platform: Android
- several APIs:
 - YouTube: Java Client Library
 - Discogs.com: RESTful interface
 - Wikipedia: MediaWiki API (HTTP)

Challenges

- no browsing ==> battery life, traffic, usability
- integration into Android framework: touch events, connectivity
- optional: location based service (concerts & shows near you)

Work plan

- 11/06: familiarize with framework & used technologies
- 12/15: running prototype
- 12/18: 2nd presentation
- 01/20: finish coding, start testing
- 01/29: final presentation
- 02/04: final deadline
