

# Application Development for Mobile and Ubiquitous Computing

## Bike riding guide First Presentation

GroupNo. 17

Team:

Nong, Yu

Li, lili

- Application Scenario
- Technologies
- Challenges
- Workplan

## Problems:

Bikers who want to ride bike in a new area.

- They are not familiar with the topography of this area
- They do not know where they can find a bicycle stand
- Sometimes they may forget where they parked
- They may get lost
- ...

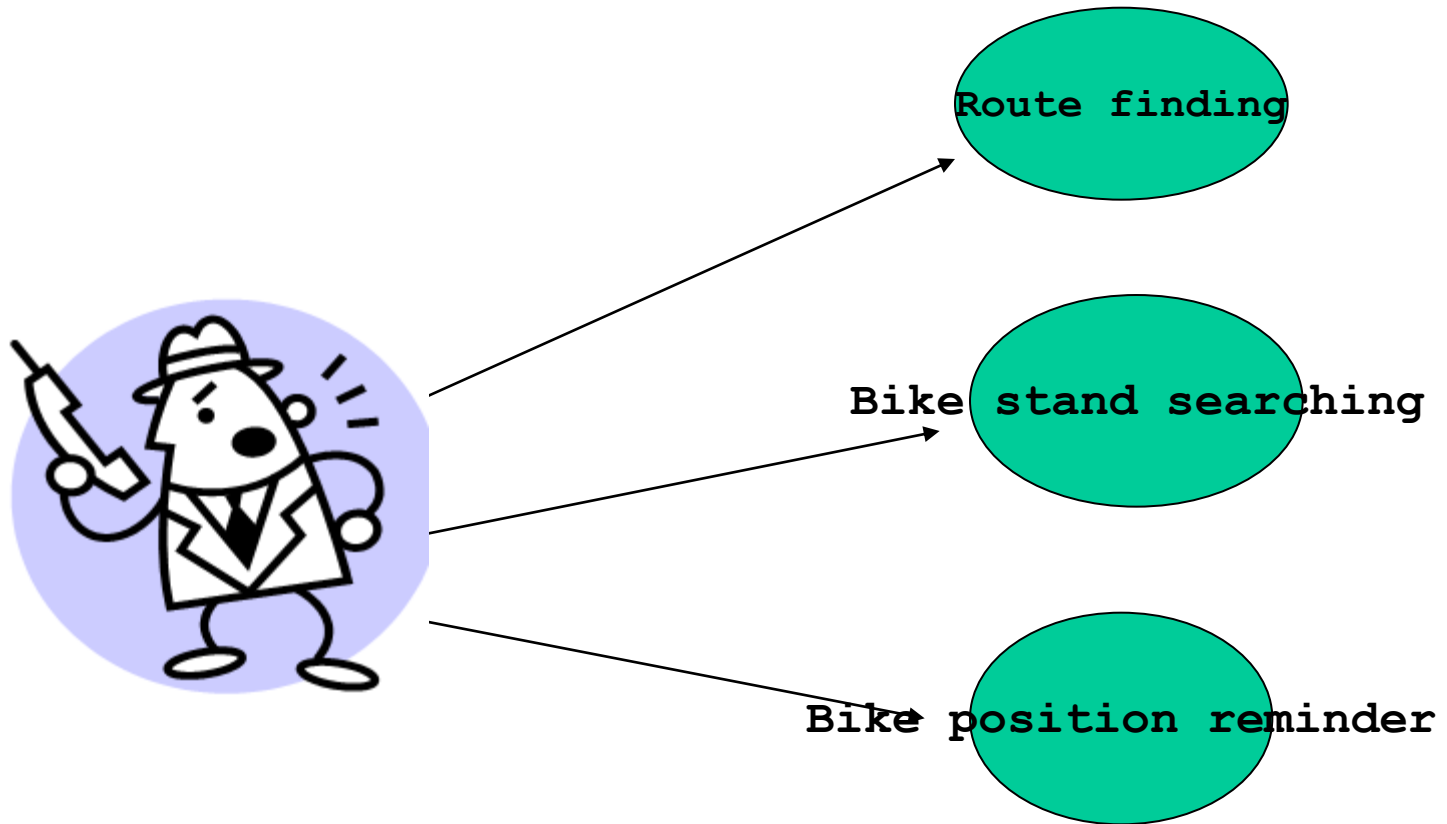

- Aim of our application:

Making a route from A to B, depending on the bikers' wishes.

GPS location to prevent them from getting lost.

Bicycle stand finder

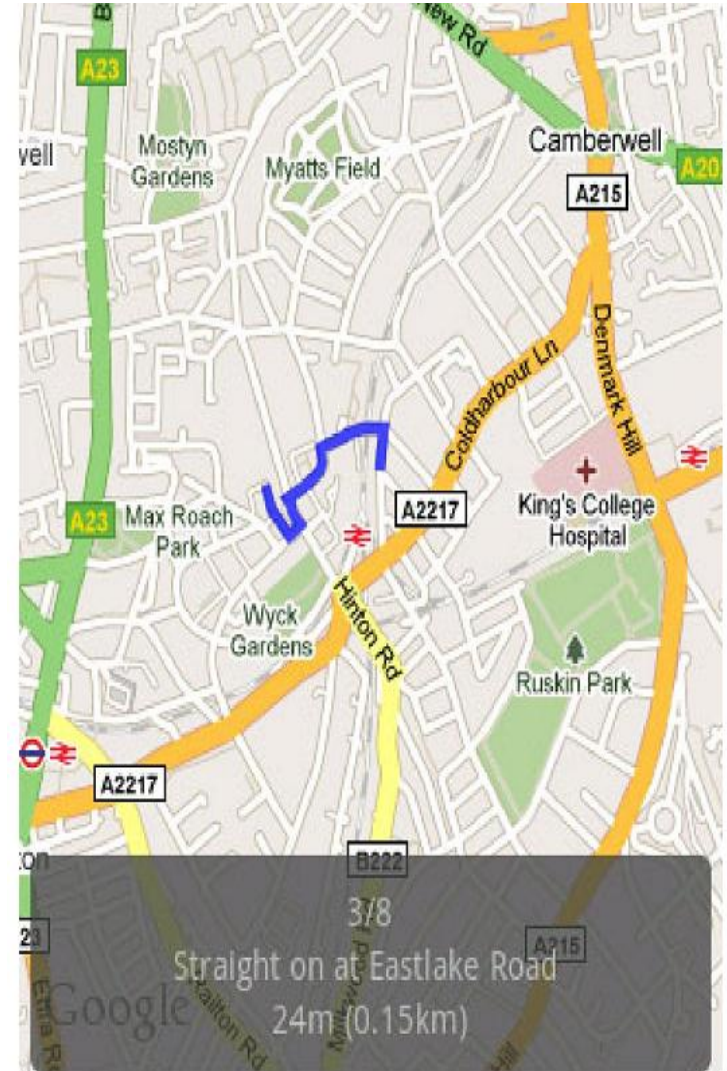

Remind them where they parked
