

# Application Development for Mobile and Ubiquitous Computing

## "SocializeMe" Socialize anytime, anywhere First Presentation

GroupNo. 4  
Team: Ligia Abigail Arghir  
Pawel Skorupinski

- Let people find a companion nearby their current position
  - Might be friends, friends of friends or people with common interests / plans
- Base on most reliable social data source - facebook social graph

- Getting bored in a city centre / uni / dormitory
  - Find people who share interests with you and talk to them in reality!
  
- Going to a party
  - Find which friends are having fun in the nearby clubs!
  
- Going alone with a train to a concert
  - Find whether somebody goes there too, meet them and go together!

- Set a privacy profile
  - Choose a nickname
  - Define based on what data people can find you
  - Define which FB data will be shown to others
- Agree on a usage of a facebook data
- Look for others
  - Define whether you look for friends or all people
  - Define a distance to be searched
  - Define by which data to look for people
- See others
  - See accessible data of people that were found
  - See those people on a map
- Contact people now
  - Send message, share interests and set meeting

Me

Nick:

Let people find me by:

Likes  Friends

Events
