Question

open

Guy came from nowhere and start killing everybody.

Answer #1

0

Terminator

Agree

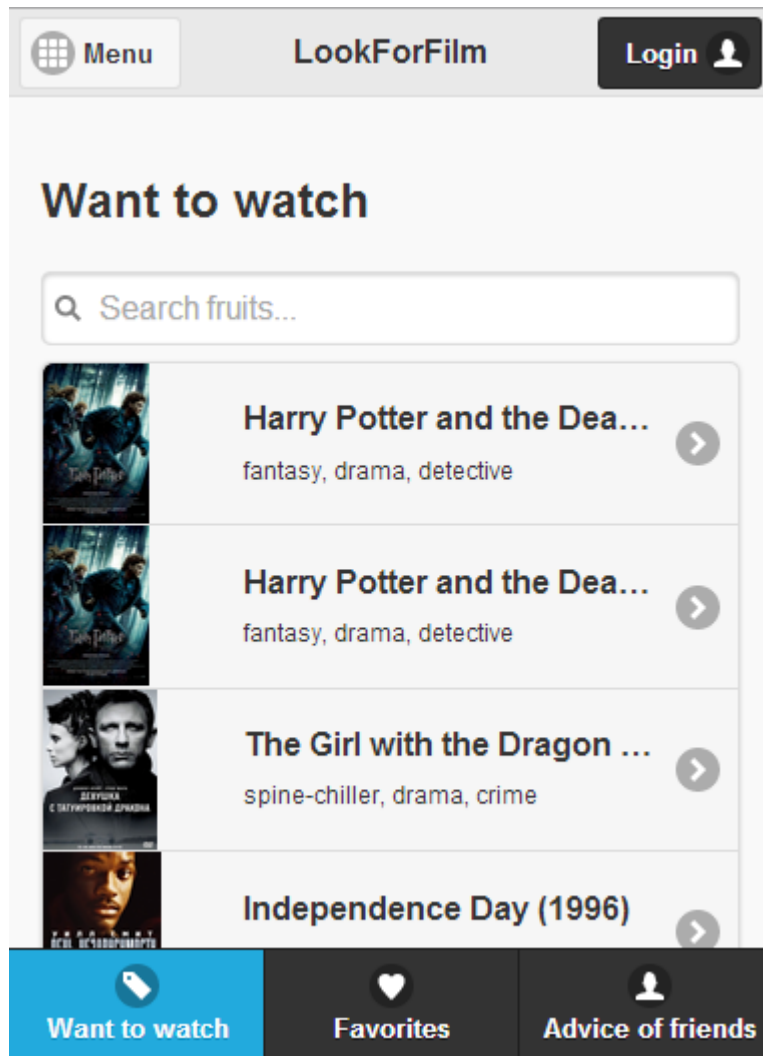

Disagree

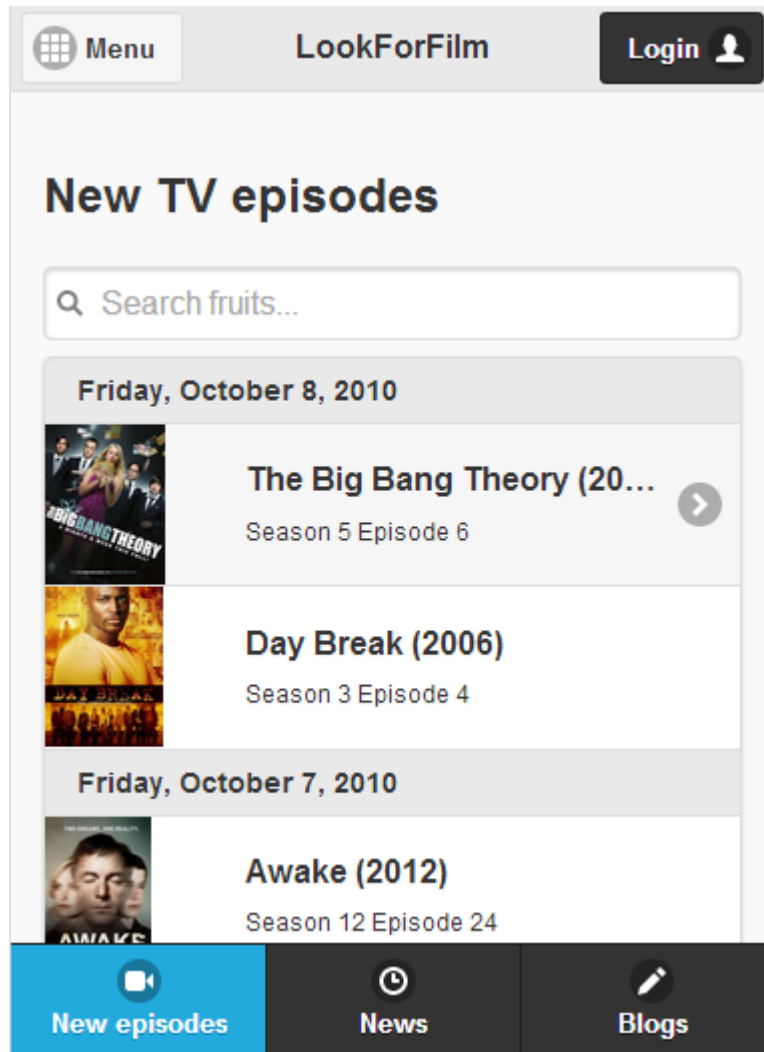

Answer #2

0

 Send description Guess movie My movies

- Lists of favorite movie in your pocket

- Aggregation of news from different web-sites;
- Feed channel of local blogs;
- List of current episodes of TV shows, that you are watching now.

- Use batch processing;
- Every action are computing on dedication server;
- Use REST for communication between mobile app and server;
- Use JSON as a communication language;
- Use jQuery Mobile Framework for interface of mobile app;
- Use platform Apache Cordova for mobile development.

- Platform Apache Cordova is buggy;
- Useless documentation of Apache Cordova;
- Using batch computation for load balancing.
