

Application Development for Mobile and Ubiquitous Computing

perapera

A location based community

First Presentation

Group No. 2

Team Awesome

Dennis Metzger and Joris Rau

Assuming you want to ...

- ... find the answer to a difficult question you just thought of
- ... find great places to go to in your area
- ... seek help in solving your homework
- ... get advice on different situations in life
- ... chat with other people near you

 Just talk to your phone!

Perapera (ぺらぺら)

- Japanese onomatopoeia for “chatter” and “babble”
- Posting a message in a certain region
- No user account required
- Get an answer via push-notification
- Posting and answering via voice is encouraged
- Answer random questions or search for specific tags

Android SDK

- Android 5 Lollipop SDK and design
- New is always better

Server for questions

- For saving voice and text questions
- MySQL

Connectivity

- Post questions even with bad reception (GPRS)

Offline

- Prepare questions for the interweb when offline
- View old answers and questions

Usability

- Personalize languages and region per user
- Intuitive user interface

- 21.11.2014
