Location Reminders

Screenshots

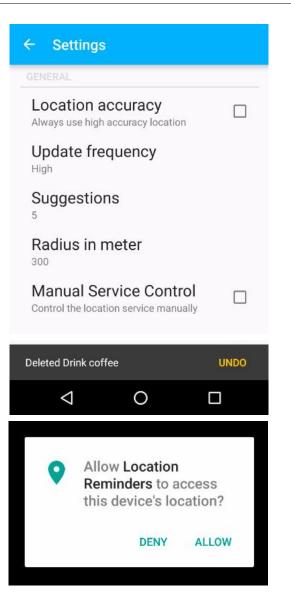

Detail view

Location Reminders

Extended App Settings

- Radius for POI suggestion
- Manual Location Service Control

Updated Notification View

• Set notification completed

Android 6 Permissions

• Permissions request

Undo reminder removing

UI improvements

Demonstration https://goo.gl/07TdsE

Offline Challenge - save reminders locally

Connectivity Challenge - use location data from multiple sources and local information when internet connection is lost

Energy Challenge - choose update frequency and location accuracy

- + Caching (POIs)
- + Filtering (radius, type)
- + Data transmission (frequency)
- Prefetching
 - no prefetching on reminder creation
- Filtering
 - no API response limiting

Experiences

- Experience with Google Maps/Places API
- Work with Android Services

Pitfalls

- Android Permissions model changes
- Notification-IDs

Thank you for your attention!
