

Access your data anywhere

SuperSync

Imagine

What is SuperSync?

- ◆ lightweight mobile client for transferring data
 - ◆ upload and download of files
 - ◆ background synchronization and backup

What is SuperSync?

- ◇ lightweight mobile client for transferring data
 - ◇ upload and download of files
 - ◇ background synchronization and backup
- ◇ seamless user experience
 - ◇ file-caching to keep them accessible

Everything anywhere in one place

- ◇ Access your documents on the go
 - ◇ always up to date versions

Everything anywhere in one place

- ◇ Access your documents on the go
 - ◇ always up to date versions
- ◇ Back up your photos without worries
 - ◇ Reliable background synchronization

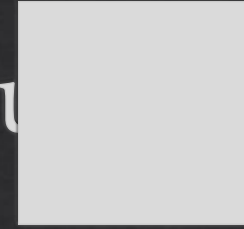

Yet another app
to trust my data?
Yikes!

- ◇ Privacy first
 - ◇ You decide where your data is saved
 - ◇ Replace iCloud / Google Drive / OneDrive
 - ◇ Use a protocol you trust (HTTPS, SFTP...)

A True Phone Whisperer...

- ◇ We listen to your phone:
 - ◇ Is the battery too low for background tasks?
 - ◇ Is your data plan already strained?
 - ◇ Do you even have internet right now?

... that also listens to you

- ◇ Customize your experience
 - ◇ Change each threshold to your liking
 - ◇ Overwrite temporarily
 - ◇ You really NEED to back up that cat video, right!?

Continuous Expansion

- ◇ Modular structure
 - ◇ Adding new protocols (WebDAV, FTPS, SCP...)
 - ◇ End-to-End encryption
 - ◇ Adjusting to future technologies and user demands

Thank you for your attention!
